Introduction

I am a full-stack developer with three years of experience in internationally recognized banking and insurance projects. I am skilled in contributing to all phases of software development. My personal objective is to optimize quality in every project I undertake. At your company, I will seek opportunities to enhance and optimize processes and outcomes.

Hard skills - JavaScript, TypeScript, HTML5, CSS3, Node.js, angular, java, SpringBoot, SQL, Jasmine/Karma, jest, junit, cloud azure, Agile Methodology (Scrum, XP e Kanban) and Github actions.

Soft skills – Continuous Learning, Problem-Solving, Time Management and Teamwork
